

REVO 27

This shelter consists of in a rapidly deployable 27 m² module.

The REVO tents are easily connectible between each other as well as and with all our types of tents and shelters.

The structure offers an innovative “water cooling” type of air conditioning system through the vaporization of recycled water between the net and the textile roof of the shelter.

These modules are highly resistant to weather conditions, namely to high wind, and do not require the installation of guy ropes.

Worldwide support and assistance are provided by our specialized technicians.

Available equipment :

- Standard air conditioning.
- Water cooling system.
- Heating.
- Camouflage.

Fabric color :

- Translucent white textile roof
- Sand color textile walls
- Other colors on request.

Climatic resistance :

- 150 km/hour wind.
- 80 dNa/m² snow.

	Length (m)	Width (m)	Height (m)	Surface (m²)	Weight (kg)
REVO 27	5.17	5.17	2.70	27	200
