

Multi-purpose tent of large dimensions (TMM)

The multi-purpose modular tent of large dimensions (TMM) consists of three independent modules (front gable, a central module and a rear gable).

The insertion of additional Central modules allows increasing the surface up to 160 m². The interior volume of the tent is large enough to enter a truck inside it. Resistant, robust and equipped with accessories, the TMM can be used effectively on all types of terrain. Transport is facilitated by the small dimensions of each module which do not exceed 1.5 m when packed and folded. With easy connection between the modules and its self-erecting inflatable frame, the tent can be installed very quickly. The TMM tent can be connected to other tents (even of smaller sizes) in all directions. The materials used have a high mechanical strength and resistance, they are also fire retardant. Support is carried out by our specialists all around the world.

Available equipment for the TMM :

- Automatic pressure maintenance system for the inflatable frame.
- Internal liner with partitioning walls.
- Sun screen.
- Additional tarpaulin ground sheet.
- Lighting system.
- Power distribution box.
- Power generator.
- Heating/air conditioning.
- Floor system (rigid).
- Separate entrance module.
- Side doors.
- Connection module allowing attaching the TMM to other tents.
- Logos and markings.

Fabric colors :

- White.
- NATO green.
- Sand.

Load resistance :

- 31 mph of wind.
- 2.05 lb/sq.ft of snow load.

External dimensions (m)	Width 8.25	Length 12.67	Height 4.10
Dimensions of elements (m)			
Rear gable	8.25 x 4.67 x 4.10		
Central module	8.25 x 4.92 x 4.10		
Front gable	8.25 x 3.08 x 4.10		
Inflating time (minute)	20		
Doors dimensions (m)	Width		Height
Small door	1.56		1.90
Main door	3.10		3.20
Mass per module (kg)			
Rear gable	198		
Central module	187		
Front gable	181		
Total mass (kg)	566
