

# Decontamination unit

## The decontamination unit of Losberger RDS provides for individual decontamination of groups of people.

The unit can decontaminate up to 30 people per line per hour in case of NBC (nuclear, bacteriological and chemical) accidents.

The container units can be connected to the inflatable tents in service in the fire departments.

The unit, fitted with all the components and accessories needed, is ready to operate the system for 1 hour.

All the accessories are stored in a technical area at the rear of the unit (boiler, generator, pump discharge and suction).

The undressing and dressing areas are separated from the rest by curtains made of PVC.

The operating of the showers can be managed automatically or manually.

## Main advantages :

- Mobility.
- Total autonomy.
- Easy handling.
- Minimum staff needed.
- Easy storage.
- Rapid deployment.

## Optional equipment :

- Flexible tanks.
- Conveyors for persons treatment of disabled.
- Stretchers.
- Inflatable tents.
- Chemical or radiological detection system.
- Protecting garments for staff.

Red-coloured container units are available in two versions :

- Version with 1 shower, dimensions : 5000 x 2438 x 2591 (mm).
- Version with 2 showers, dimensions : 6058 x 2438 x 2591 (mm).

Dimensions of the technical room (located at the rear) :

- Version with 1 shower, dimensions : 2500 x 2438 x 2591 (mm).

Details of the decontamination area :

- 1) Undressing area
- 2) Shower zone
- 3) Rinsing zone
- 4) Drying zone
